

NABAKEM[®]
Chemicals & Aerosol

K2

Antirust Lubricant

Packaging • Aerosol 420ml/can, 20cans/Box

Unit :

Features

NABAKEM K-2 is a lubricating and anti-rusting penetration agent forming thin film on metal surface to protect all kinds of metal. Lubricates and removes moisture from all firearm surfaces. Seals firearm parts from rust, corrosion and moisture. Protects up to several months with one application

Uses

- Maintenance of military equipment (Small arms kind)
- Disassembly of fixated bolts and nuts
- Electric systems of automobiles and diesel trains
- Maintenance of communication equipment on the ground, high land and in the sea
- Maintenance of equipment: aircrafts, automobiles, elevators, hoists, air tools and electric equipment
- Relaxation of pressurized area of machinery for industry, vessel, agriculture and transportation, and home appliances

How to Use

- Spraying after cleaning foreign substances is more effective
- Spray it sufficiently to keep lubricating and anti-rusting film even.
- Spray with extension tube to the nonaccessible areas.
- The film of NABAKEM K-2 is easily cleaned by NABAKEM DC-5000 or MC-2.

Cautions

- Remove dust or dirt off applied surface to apply it. Use brush or sand paper to remove rust or scale and apply it.
- Even though it is low-flammable, keep away from fire to spray it. Provide good ventilation for long-time use.
- Keep in the well-ventilated place below 40°C.
