Unit :

Features

Mold Release R-2 (Mold Release for 2nd Processing) is a paintable release agent developed by our unique design. This product has best release. Ideal for delicate and precise mold. No residues are remained. Using this product, defect occurrence ratio is reduced. Also, quality improvement, work hour reduction and cost saving are obtained. Additionally, it is used widely for polishing, surface protection and lubrication.

- Excellent lubrication and release
- Quick drying product with excellent release
- No residues remained on mold
- Formation of even film
- Noncorrosive to mold
