SP-300

SPAZERO SP-300 (Antispatter Agent)

Packaging Aerosol 450g/can, 20cans/box

Unit :

Features

- Excellent effect of preventing weld-spatter.
- No offensive smell : working condition is clean, and fast drying(10~20min)
- Superior application and durability.
- Not affecting the work of welding.
- Do not use at the surface that will be coated with paint.

Uses

- SPAZEROTM SP-300 is a semi-transparent liquid antispatter agent for stainless steel.
- Coating cannot be applied to the area where this product is used.
- If coating follows after welding, do not use this product but Paintable SPAZEROTM Series.

How to Use

- Degrease or remove foreign substances. Apply it.
- Apply it thinly and evenly on the welding target area by using spray or brush before doing welding.
- It does not matter that you do welding immediately after application. It is more effective to do welding after checking tack free drying.
- If you apply it temporarily onto welding area of whole machining object and weld it for one month under work process, spatter does not adhere to it.

Cautions

- Ventilation is necessary during use.
- Do not inhale it into your body for long.
- Avoid long-time skin contact.
- Keep in the place below 40°C without direct sunlight.
