Unit :

Features

This product removes rust and scale of copper and copper alloy products, and reproduces the beautiful color unique to copper products. Temporary anti-rust effects.

No gas during use. This product can remove the rust of copper, copper alloy product and iron welded with copper.

Uses

Accessories, telephone parts, brass, defense–industry parts, washer etc.

How to Use

- Remove the foreign substances and oil contents on the target objects before use
- Dilute the product with water in adequate ratio depending on the state of target objects
- Dilute the product with water at 2:1 at normal temperature.

Cautions

- Wear protective equipment like rubber gloves, boots, protective clothing and safety goggles.
- Flush contaminated skin immediately with water.
- High pressure water rinsing is required after use for removing residues.
- After neutralized cleaning is finished, remove moisture by using compression air or thermal wind.
